WORK EXPERIENCE

2026 - PRESENT

Apex Systems | Torrance, CA

Field Service Technician II / Desktop Support

- Deployed 20+ workstations and printers on a live rollout across client sites, ensuring on-time, error-free installations.
- Completed site deployment lifecycles, including pre-site readiness calls, site surveys, live physical installation, and post-installation sign-offs.
- Served as the primary on-site technical point of contact, managing real-time scheduling shifts, client interactions, and site walkthroughs.

2025 - PRESENT

Personal Homelab | 23322 Los Codona ave

HomeLab

- Created and Designed Virtual networks using VMware and deployed end user and network devices.
- Deployed a ticketing system using osTicket on the Ubuntu system, and simulated common end user events like password resets on Active Directory.
- Created a Hybrid Cloud environment using Azure's VPN gateway which connected to my local home virtual network on VMware.

2021 - 2022

El Camino SRC | 16007 Crenshaw Blvd.

Student Worker V

- Provided support to students by troubleshooting software issues and resolving problems.
- Provided students with resources, navigation issues, and any general questions they may have had.
- At the Special Resource Center, I learned how to communicate effectively by helping students navigate the college's registrar.

EDUCATION

Bachelors of Network and Digital Technology

University of California Santa Cruz

2022 - 2025
